The author accepts only the initiatory portion of the Lotzian concept of interaction, and develops it from the standpoint of physical science to its ultimate negatory conclusion in his Theory of Interdependence. A total negation of action, change, and becoming is the final result of this System of Complete Relativity. In the year 1896, the writer conceived his Theory of Interdependence as a System of Complete Cosmic Relativity requiring an Absolute Principle for the resolution of its paradoxical negations. In the same year he formulated the fundamental theses upon which this work rests. Basic amongst these theses was the conception that the laws of the primordial activity ultimates or particles are also the laws of the entire physical universe. Consequently we should be able to pass uninterruptedly from the activities of the sub-atomic particles to the behavior...
