

## Effect of some free radicals on biomolecules

Filesize: 2.07 MB

### ***Reviews***

*It is in a single of the best book. This is for those who statte there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.*  
*(Dr. Barney Robel Jr.)*

## EFFECT OF SOME FREE RADICALS ON BIOMOLECULES

To save **Effect of some free radicals on biomolecules** eBook, remember to refer to the web link listed below and download the document or gain access to additional information which might be have conjunction with EFFECT OF SOME FREE RADICALS ON BIOMOLECULES ebook.

LAP Lambert Academic Publishing Jul 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x10 mm. Neuware - The scavenging behavior of a series of 36 phenolic, 17 anilines and 11 heterocyclic compounds toward Hydrogen peroxide and DPPH was examined. In Hydrogen peroxide scavenging activity, the aniline series are more active than the phenolic series due to the reduction properties of the aniline compounds. While, in the DPPH scavenging activity, the phenolic compounds are more active than the aniline compounds due to the lower bond dissociation energies (BDE) of O-H than that of N-H. The antioxidant activity related to the compound structure was found to be dependable on the number and position of the included active group (-OH or -NH<sub>2</sub>). The ortho position was found to be the more active one, due to its ability to form intra-molecular hydrogen bonding (iHB). The presence of double aromatic ring structure in phenolic and aniline compounds has a positive effect on the scavenging activity in both assays. Electron withdrawing group has a positive effect on the hydrogen peroxide scavenging activity but it has a negative effect on the DPPH scavenging activity. The protective role of the most active phenolic and aniline compounds in linoleic acid model was also examined. 164 pp. Englisch.
