Excerpt: . is, that on account of the severe climate of the north part of Lake Champlain, the ice remains on the lake until the sun has advanced very far northward, and the surrounding country has become quite warm. By alternate freezing and thawing, the ice becomes granulated, and very porous, and consequently very absorbent of water. When this process has reached a certain point--that is the moment when the specific gravity of the ice, thus soaked with water, exceeds that of the medium itself--the whole sinks and disappears at once. A most singular phenomenon, truly. THE ELOQUENCE OF THE HANDS. The hands are by the very instincts of humanity, raised in prayer, clasped in affection; wrung in despair; pressed on the forehead when the soul is perplexed in the extreme; drawn inward, to invite; thrustforth, objectively, to repel; the fingers point to indicate; and...
