SUPERCONTINENT: TEN BILLION YEARS IN THE LIFE OF OUR PLANET

Harvard University Press. Paperback. Book Condition: new. BRAND NEW, Supercontinent: Ten Billion Years in the Life of Our Planet, Ted Nield, To understand continental drift and plate tectonics, the shifting and collisions that make and unmake continents, requires a long view. The Earth, after all, is 4.6 billion years old. This book extends our vision to take in the greatest geological cycle of all--one so vast that our species will probably be extinct long before the current one ends in...

Reviews

This publication can be well worth a study, and far better than other. Better then never, though i am quite late in start reading this one. Its been printed in an exceedingly simple way and it is only soon after i finished reading through this book in which really transformed me, alter the way in my opinion.

-- **Miss Alisa Toy**

This is the very best ebook i have got study until now. This is for those who statte there had not been a worth reading. You can expect to like the way the writer write this book.
